Summary

Full-Stack Software Engineer with professional experience building scalable SaaS platforms, REST APIs, secure authentication systems, payment integrations, and cloud-native applications using TypeScript, Node.js, React, and Next.js.

Experience

Servi — Buenos Aires, Argentina

Junior Full-Stack Developer (Remote)

2023 – 2024

- Designed and developed full-stack features using React, TypeScript, and Node.js across frontend and backend systems.
- Built and maintained REST APIs, optimized application performance, and contributed to scalable system architecture.
- Led sprint planning and task allocation during Agile development cycles, helping coordinate the team's work and unblock technical issues.
- Performed code reviews, provided technical guidance to teammates, and helped maintain code quality and development standards.
- Contributed to product architecture, feature planning, and continuous improvements across multiple areas of the platform.
- Collaborated with cross-functional teams including designers, stakeholders, and developers.

Freelance Software Developer

2023 – Present

- Owned the end-to-end software development lifecycle, from requirements gathering and system design to implementation, deployment, and ongoing maintenance.
- Designed and developed custom full-stack applications, internal tools, and business solutions for clients across different industries.
- Built REST APIs, backend services, and responsive web applications using TypeScript, Node.js, React, and Next.js.
- Deployed and maintained applications using Docker, Vercel, Railway, and cloud services.
- Collaborated with clients and developers to deliver software solutions, including business management systems, public sector applications, automation tools, and multimedia projects.

Projects

RecoverPay — Multi-Tenant SaaS Payment Recovery Platform

TypeScript, Next.js, Express.js, PostgreSQL, Prisma, Stripe, Docker

- Architected and developed a multi-tenant SaaS platform for automated Stripe payment recovery using Express.js, TypeScript, Prisma ORM, and PostgreSQL.
- Integrated Stripe Connect, Checkout, Billing Portal, and Webhook processing with idempotent event handling and configurable payment retry workflows.
- Implemented JWT authentication, 2FA (TOTP), RBAC, rate limiting, XSS protection, and security middleware using Helmet and Zod validation.
- Built a responsive Next.js dashboard with React, Tailwind CSS, shadcn/ui, and React Hook Form for payment, subscription, and tenant management.

- Containerized the application with Docker, automated CI/CD pipelines using GitHub Actions, and deployed on Railway

Demo - recoverpay-psi.vercel.app

ERP System — Business Management Platform

TypeScript, Next.js, Node.js, Express, PostgreSQL, Prisma, Docker

- Designed and developed a full-stack ERP system for SMEs using Hexagonal Architecture, TypeScript, Next.js, Express, and PostgreSQL.
- Built secure REST APIs with JWT authentication, role-based access control (RBAC), Zod validation, and Prisma ORM.
- Integrated AFIP/ARCA electronic invoicing (SOAP, CAE, SIRE) supporting multiple invoice types and fiscal compliance workflows.
- Containerized the backend with Docker, deployed on Railway and Vercel, and implemented a scalable multi-tenant architecture

Demo - <https://erp-theta-three.vercel.app/>

EvoFit — Multi-Platform Fitness Platform

TypeScript, Next.js, Express.js, Flutter, PostgreSQL, MySQL

- Engineered a multi-platform fitness platform consisting of an Express.js REST API, Next.js web application, and Flutter mobile app, following Clean Architecture and repository pattern principles.
- Implemented secure authentication using JWT, Google OAuth, NextAuth, and role-based access control (RBAC) across web and backend services.
- Built real-time features with Socket.IO, REST APIs, Prisma, Sequelize, and Swagger/OpenAPI documentation.
- Built responsive interfaces with React, Tailwind CSS, Flutter, and integrated TanStack React Query and Zustand for scalable state management

Demo - <https://evofitweb.vercel.app/>

Open Source

Node.js Website—GitHub

- Contributed to the official Node.js website by submitting pull requests and improving documentation and website functionality.
- Fixed UI issues and improved website functionality through pull requests reviewed by the Node.js maintainers.
- Collaborated with maintainers through code reviews and GitHub discussions

Team Craft — GitHub

- Contributed new features and bug fixes to a collaborative open-source project using Git and GitHub workflows.
- Collaborated with other developers through pull requests, code reviews, and issue discussions.

Education

National University of Río Cuarto

Bachelor of Computer Science — Expected graduation: 2027

Relevant Coursework:

Algorithms and Data Structures, Operating Systems, Database Systems, Software Engineering

Skills

Languages: TypeScript, JavaScript, Java, Python

Frontend: React, Next.js, Tailwind CSS, Zustand, TanStack React Query

Backend: Node.js, Express.js, Prisma ORM, Sequelize ORM, Zod, Passport.js, NextAuth.js

Databases: MySQL, PostgreSQL, MongoDB, Supabase

Authentication & Security: JWT, OAuth 2.0, RBAC, 2FA (TOTP)

Architecture: REST APIs, Clean Architecture, Hexagonal Architecture, Repository Pattern, Dependency Injection, Multi-tenant SaaS

Cloud & DevOps: Docker, Docker Compose, GitHub Actions, Railway, Vercel

Testing: Jest, Supertest

Tools: Git, GitHub, Swagger/OpenAPI

Payment & Integrations: Stripe, AFIP/ARCA, Socket.IO
