Summary

Junior Full-Stack Developer with experience building web applications using TypeScript, Next.js, and Node.js. Skilled in designing REST APIs and developing scalable backend systems while collaborating in agile teams. Eager to continue learning and driven to improve.

Experience

Servi — Buenos Aires, Argentina Junior Full-Stack Developer

Remote
2023 – 2024

- Developed full-stack features using **React, TypeScript, and Node.js**.
- Designed and implemented **REST APIs** to support frontend functionality.
- Participated in **daily stand-ups, sprint planning, and technical discussions**.
- Performed **code reviews** and helped maintain code quality across the team.
- Contributed to product development in a **startup environment**, working across frontend and backend systems.

Freelance Software Developer 2023 – Current

- Developed **full-stack web applications** for personal and collaborative projects.
- Designed and implemented **REST APIs and backend services using Node.js and TypeScript**.
- Built responsive user interfaces using **React, Next.js, and TailwindCSS**.
- Deployed applications using **Vercel, Railway, and cloud platforms**.
- Collaborated with other developers on small software projects.

Projects

RecoverPay — SaaS Payment Recovery Tool TypeScript, Next.js, Stripe, Node.js

- Built a **full-stack SaaS platform** to recover failed Stripe subscription payments.
- Developed the **frontend dashboard using Next.js** to monitor and manage payment recovery workflows.
- Implemented backend services and **Stripe webhook processing** to handle subscription lifecycle events.
- Designed the system architecture for **automated payment retry and notification flows**.
- **Demo** - recoverpay-psi.vercel.app

ERP System — Business Management Platform

- Developed a business management system to handle **clients, invoices, and administrative operations**.
- Designed backend services and database structures for **business workflows and data management**.
- Implemented modular architecture for scalable business features.

EvoFit — Fitness Platform

- Built a full-stack fitness platform with **separated frontend and backend architecture**.
- Implemented APIs and business logic to manage **users, workouts, and fitness data**.
- Developed responsive user interfaces for web access.

Open Source Contributions

Node.js Website — GitHub

- Contributed minor improvements to the official Node.js website repository.
- Collaborated through pull requests and GitHub discussions with project maintainers.

Team Craft — GitHub

- Contributed to the development of an open-source collaborative project.
- Participated in improving code and submitting pull requests.

Education

National University of Río Cuarto

Bachelor of Computer Science, 2022-2027

Relevant Coursework:

- Algorithms and Data Structures
- Operating Systems
- Database Systems
- Software Engineering

Skills

- Typescript, Javascript, Java
- React, NextJS, HTML, CSS, Tailwind
- Node.js REST APIs, Prisma, Zod, ExpressJS,
- Mysql, PostgreSQL, MongoDB
- Git, Github, Vercel, Railway, Supabase
